## USERS MANUAL

- To Turn on the HHMD use the ON/OFF Switch (1), by pressing ON Position. The HHMD will be operate as long as the HHMD ON/OFF Switch will be Turned On, when not necessary do not forget to switch the ON/OFF Switch to OFF Position to Turn Off the equipment.
- For the Audible/Silence Mode Selection use the Switch Nr. (2) Use ON Position for Audio-Visual Operation and OFF Position to Operate in Silence Mode (Visual Indicator Only).  
(Vibration Feature / Optional)
- When the HHMD is Turned ON the equipment operates a Self test and indicates the Battery Level on LED Vu-Meter (4) for a short period. In the event there will be a Low Battery Level the User is being warned by an Intermittent "Beep" sound on a continue basis. When the Battery Charge Level is less than the operation requirements the warning turns to a continue basis "Beep" sound and the HHMD can not detect any further. Pls. charge your detector. First charge 15 hurs, latter charges 10 hours. Pls. do not use while charging.
- When the Equipment is Turned ON use the buttons (5) to adjust the sensitivity level as per your required security concerns and the environment the HHMD is in use. (LED Nr. 5 indicates the Highest Sensitivity and the LED Nr. 1 is for the Lowest Sensitivity on LED Vu-Meter (4).
- Moving the HHMD close (as per detection sensitivity) to a Metal Object will result in Audio and Visual Alarm Indicators which can be seen on LED Vu-Meter (4).  
Please kindly contact us for any further information requests.
